Sprint 1 Report

Product Name: Homie
Product Team: Homies (Andy Wong, Keith Ho, Ben Pao, Mary Chern)
Date: October 21, 2018

Actions to stop doing:
1. Stop meeting at each others houses because we are too comfortable and easily get distracted, in addition, there are often other people in the house that cause noisy disruptions to our discussions.
2. Getting distracted during meetings due to side conversations or discussing what we can build instead of actually building the product.
3. Pushing meetings back 30 minutes because someone can't make it on time, this causes everyone to have to show up and waste 30 minutes of their time

Start doing
1. Meet at the designated lab or library rooms because we are better able to focus and not get distracted by other people/ things to do.
2. As Scrum master, send out reminders for meeting times 1 day ahead so that all team members know that we are planning to meet, and no one has an excuse to push the meeting back.
3. Manage scrum board better, better we often don't know what phase of the task development we are in.
4. Meet as a group and code together, so that we can have open discussion about what each person is doing and be on the same page
5. Have more discussion when we develop the tasks for sprint 2, this way we can properly plan our sprints and not over-commit to too many tasks.

Keep doing
1. Meeting 4 times per week so that we can have more discussion on what we are doing

Work Completed:
1. Set up our development environment
2. Decide which database
3. Complete multiple tutorials
4. Create a database to store information
5. Pass information to database
6. Create a login page
7. Write unit tests for login page

Work not completed:
1. Create a nav bar
2. Create a supply page
3. Link supply to useres in database and portray the supplies

4. Add links to different pages on the bar
5. Create a chores chart
6. add/edit/delete buttons on chore page
7. Create a chore wheel to be able to rotate on a weekly basis

Total number of user stories completed during the prior sprint.
4 user stories completed during the prior sprint.

User stories per day: .3 user stories per day

Total number of estimated ideal work hours completed during the prior sprint.
Total number of ideal work hours completed during the prior sprint is ~70hours.

User stories per hour: .05 user stories per hour

Total number of days during the prior sprint.
The last sprint took 14 days

The final sprint burnup chart for the previous sprint should be available for viewing in the lab and an email of this chart sent to the TA/prof.
